Market Instrument Mastering Platform

Instrument Mastering for STP Assurance

 Authenticate with Biometrics

Enterprise secure entry for authorized personnel only

For DataOps Analysts, Risk Reviewers, and Operations Teams

Secured by enterprise-grade authentication

Why This Product Matters?

STP failures are silent revenue killers. They delay trades, create operational risk, and expose firms to compliance liability.

- *Trade booking delays*
- *Operational risk*
- *Compliance exposure*

30–40%

of new instruments fail STP on first attempt

5+

data sources reconciled manually per instrument

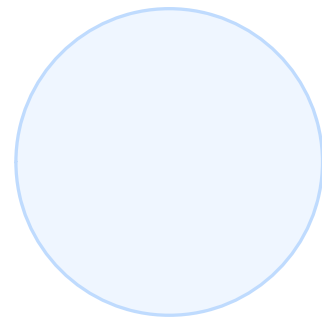

0

standardised review interface — teams use spreadsheets and emails

end-to-end audit trail for approvals or data lineage

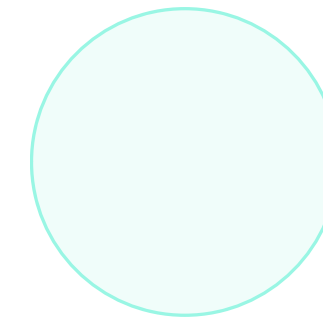

Users Persona

DataOps Analyst

Instrument Onboarding Specialist

- Discover & search instruments
- Enrich from multiple data sources
- Validate attributes & resolve conflicts
- Submit for risk/compliance review
- Monitor pipeline & STP readiness

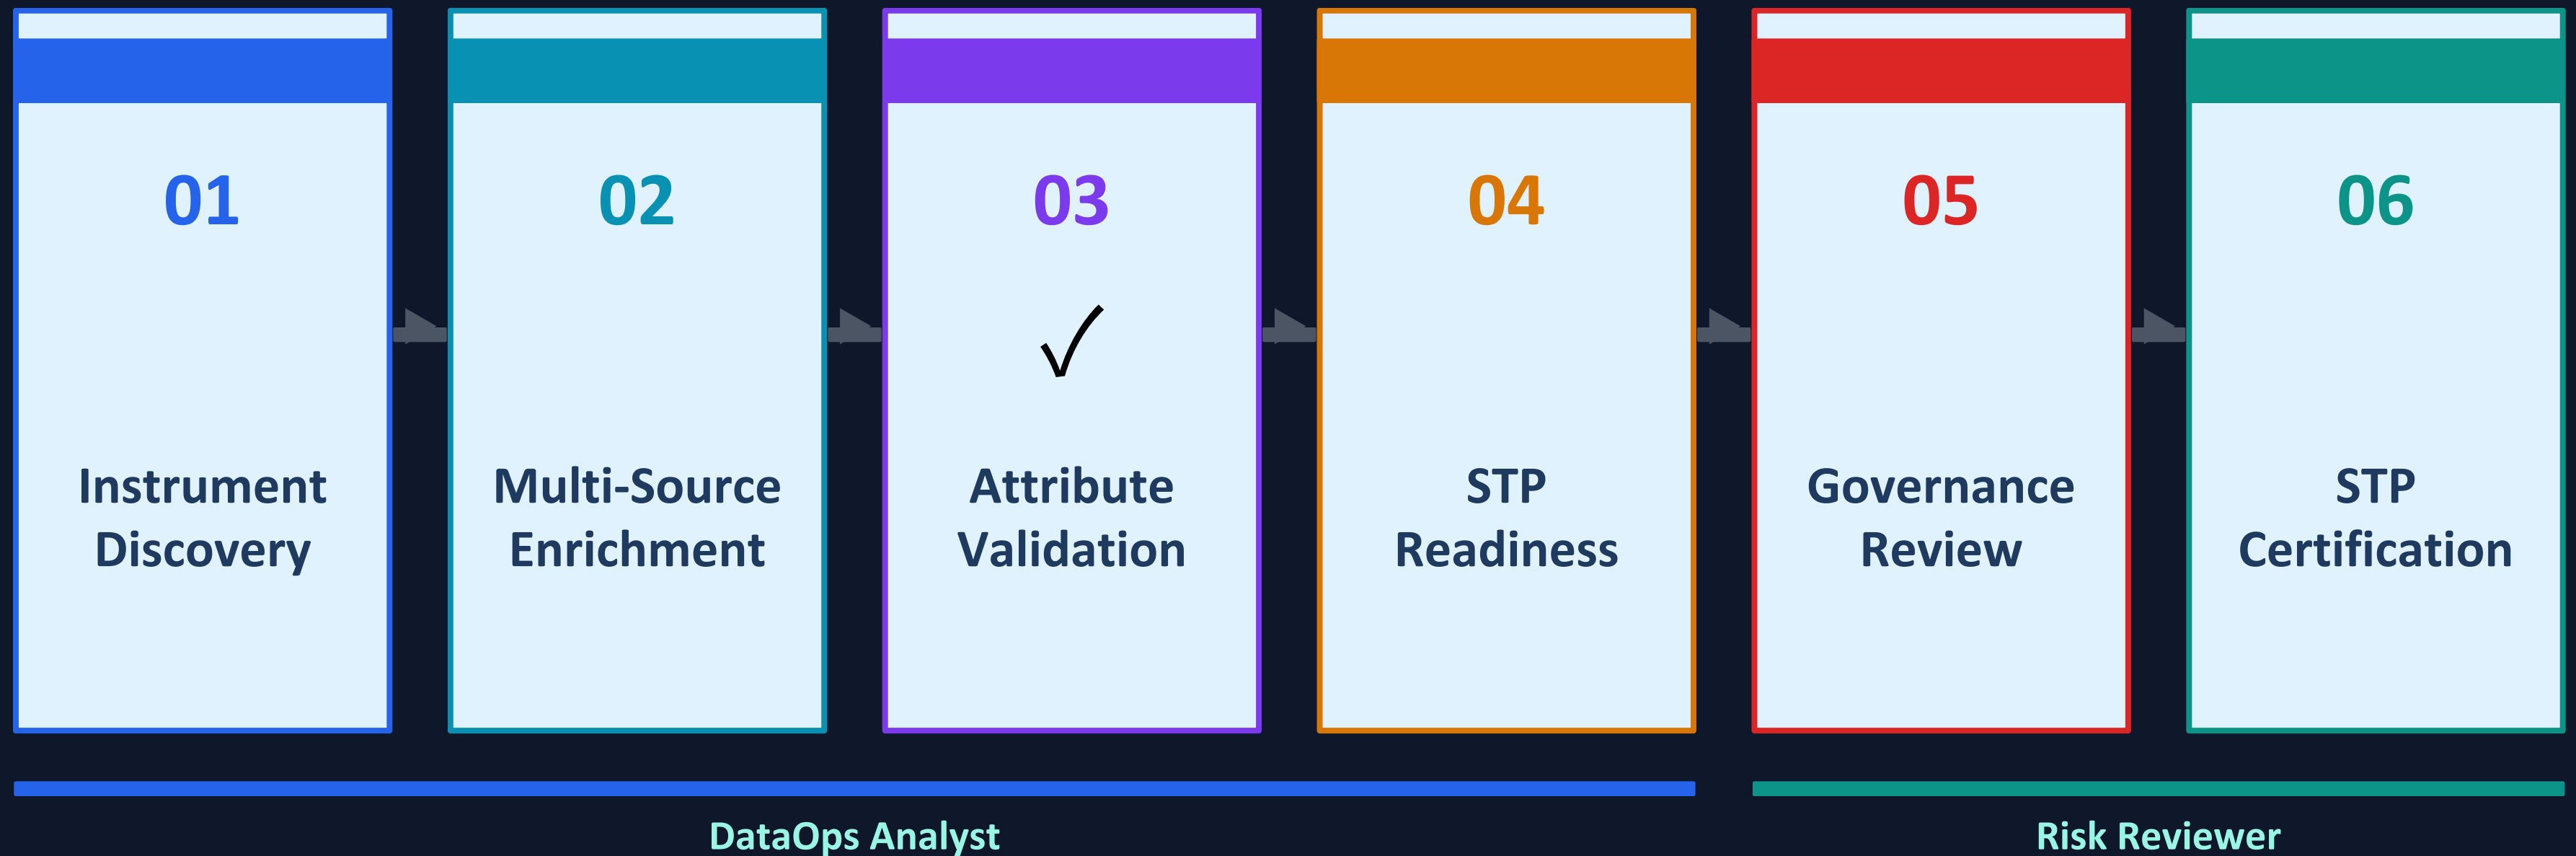

Risk Reviewer

Compliance & Risk Oversight

- Inspect attribute lineage & sources
- Review risk flags & conflicts
- Apply confidence score overrides
- Approve or reject instruments
- Certify for STP entry

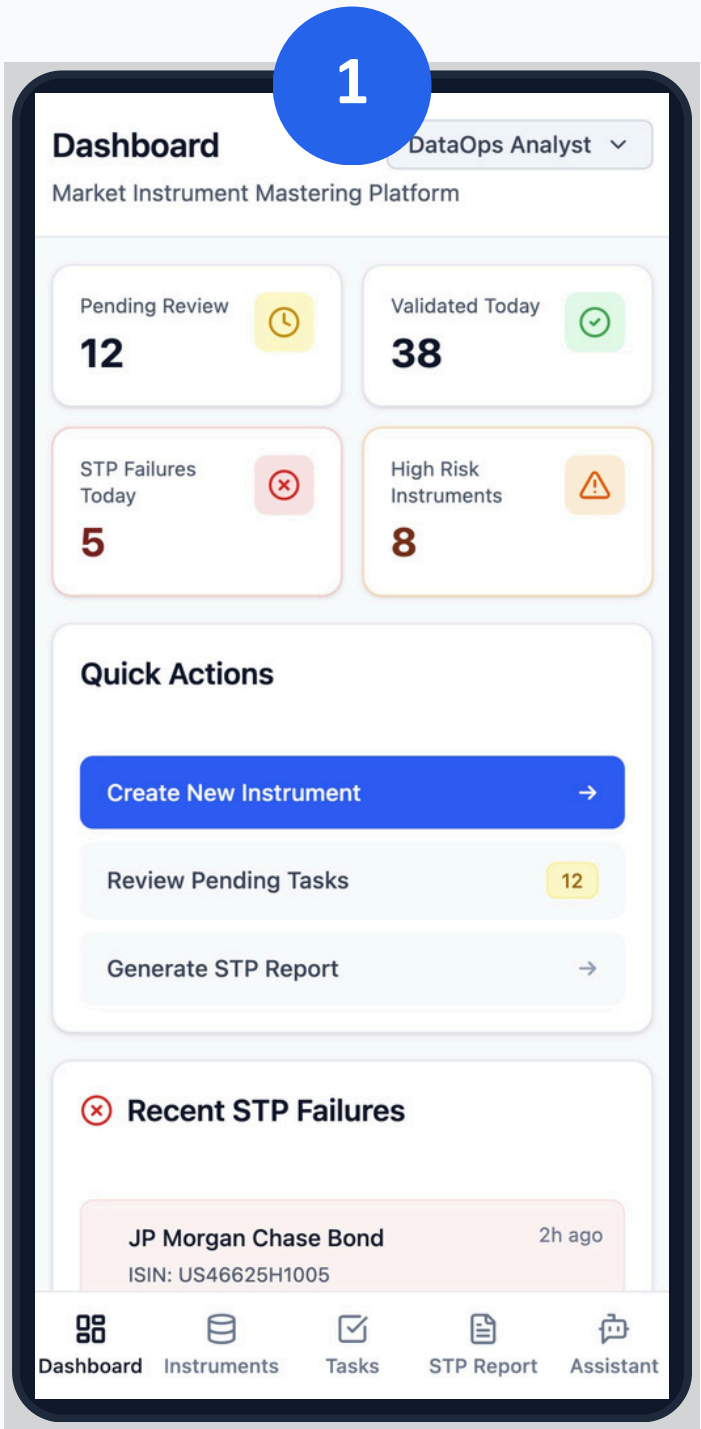

End-to-End Workflow

From instrument discovery to STP certification — a governed, AI-assisted pipeline

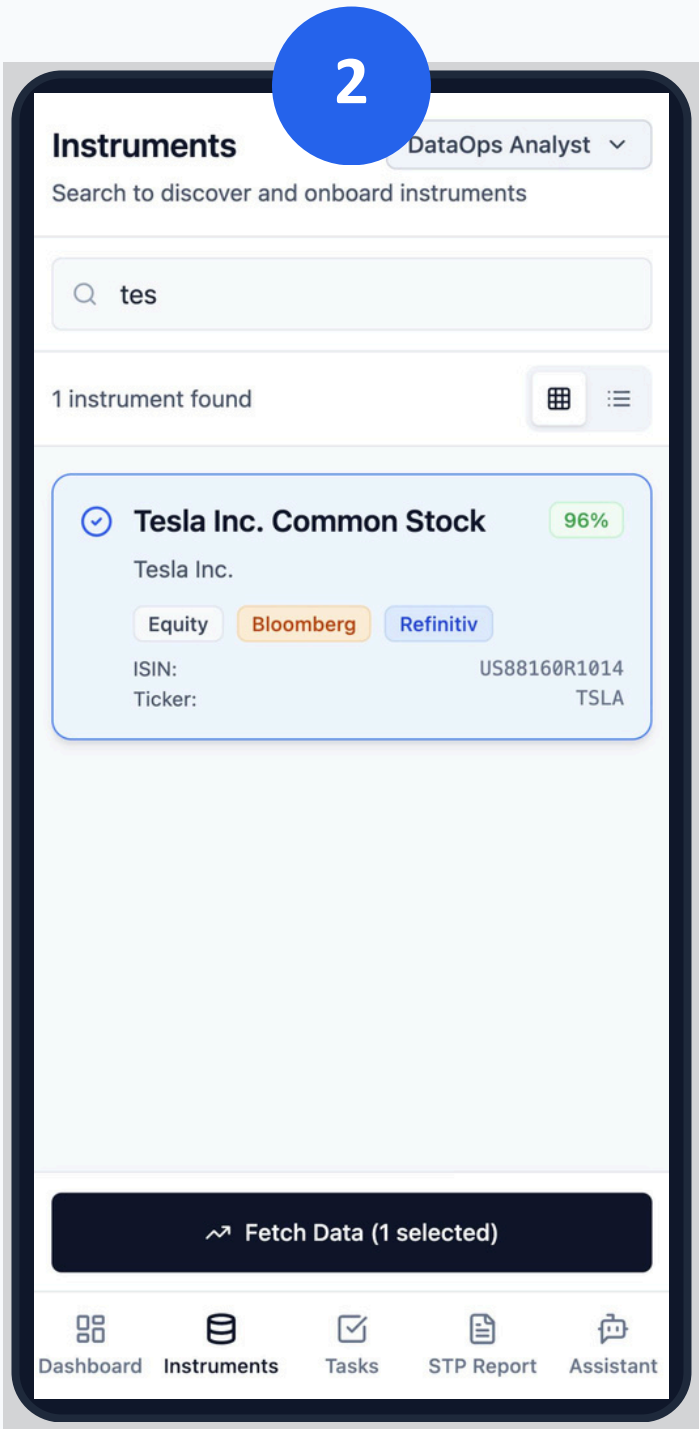

DataOps User Journey — Screen Walkthrough

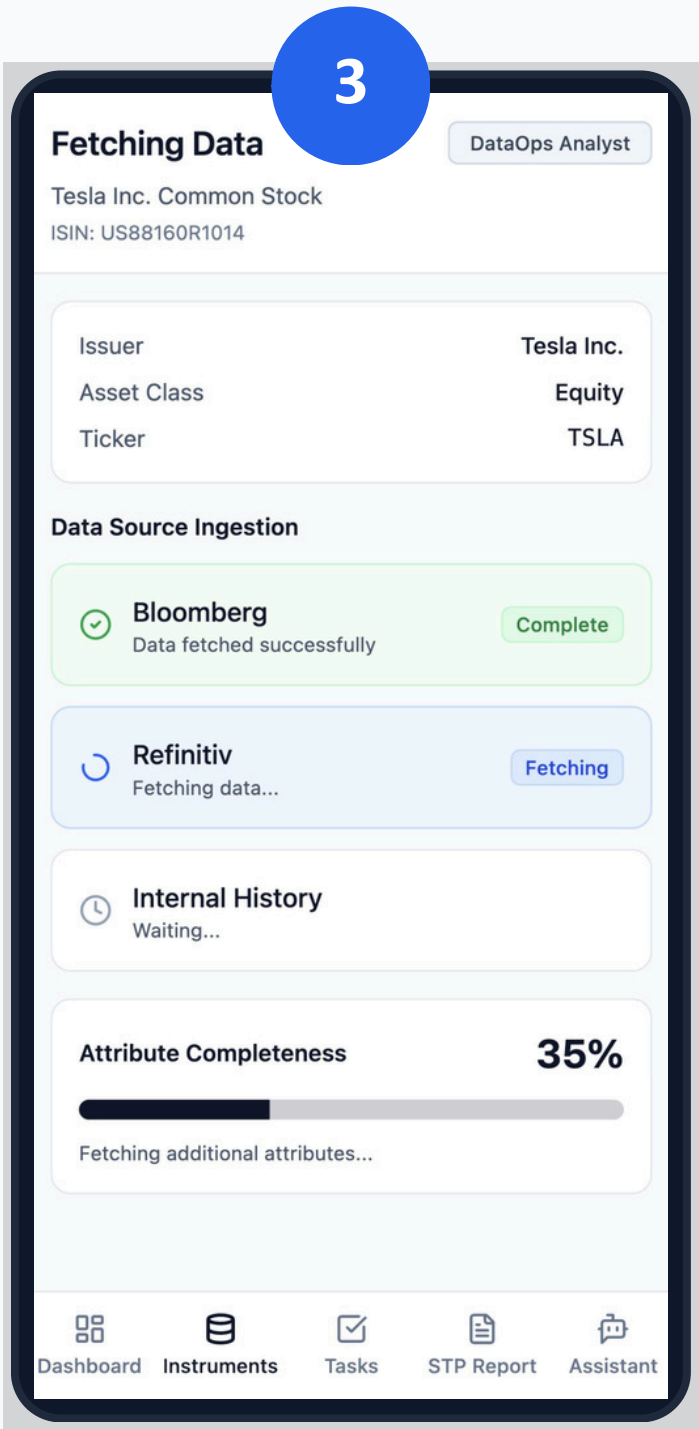

DataOps Analyst

Dashboard

Search TSLA

Multi-Source Fetch

Pipeline Dashboard

Live STP health, pending tasks, and recent STP failures at a glance

Instrument Search

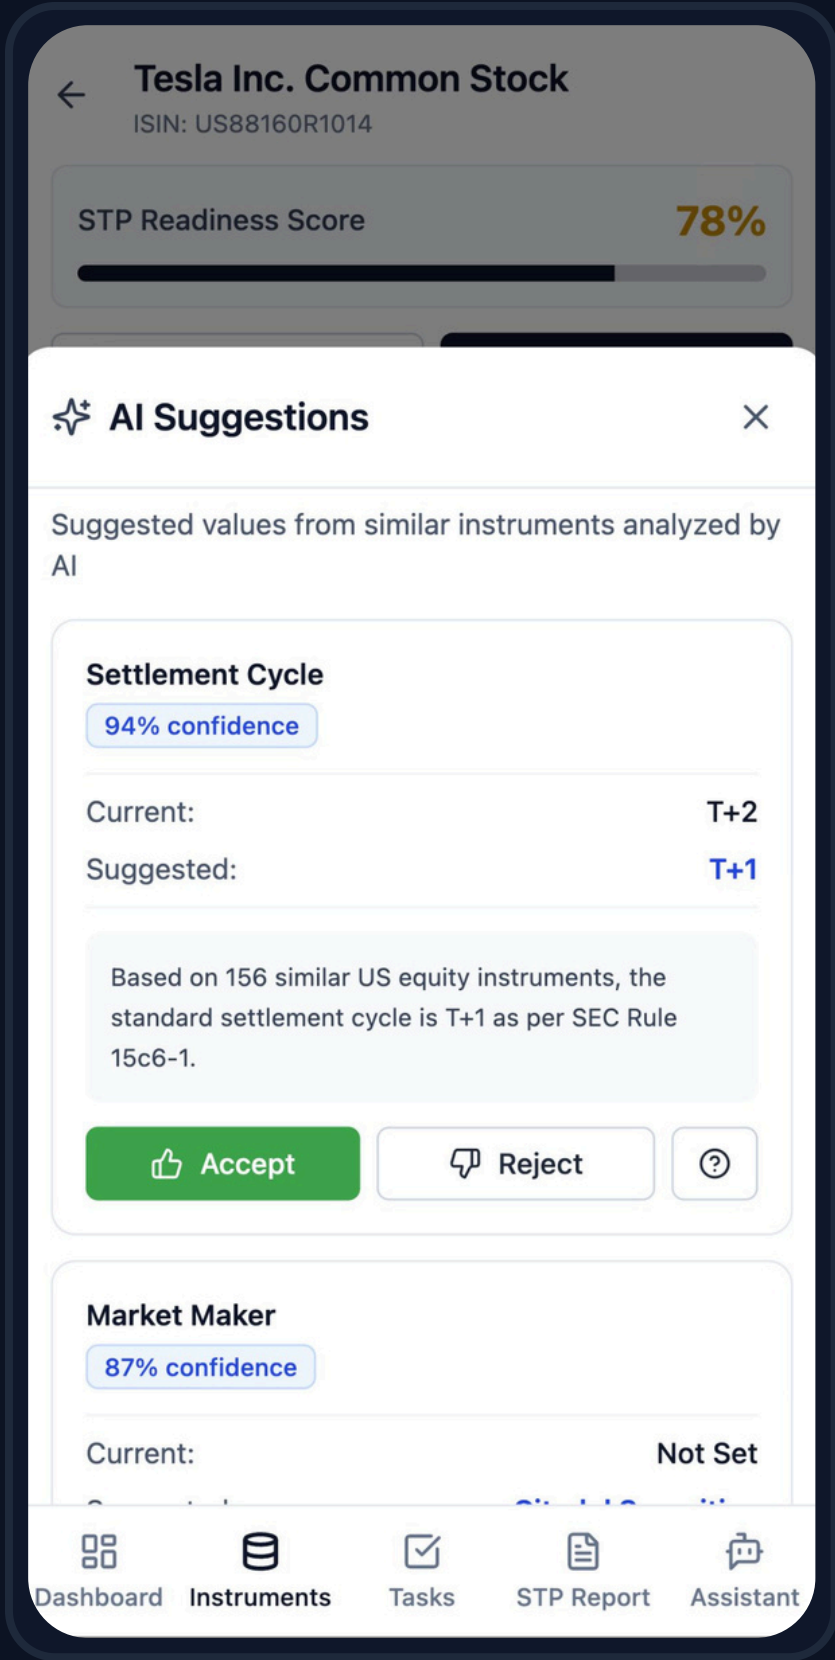

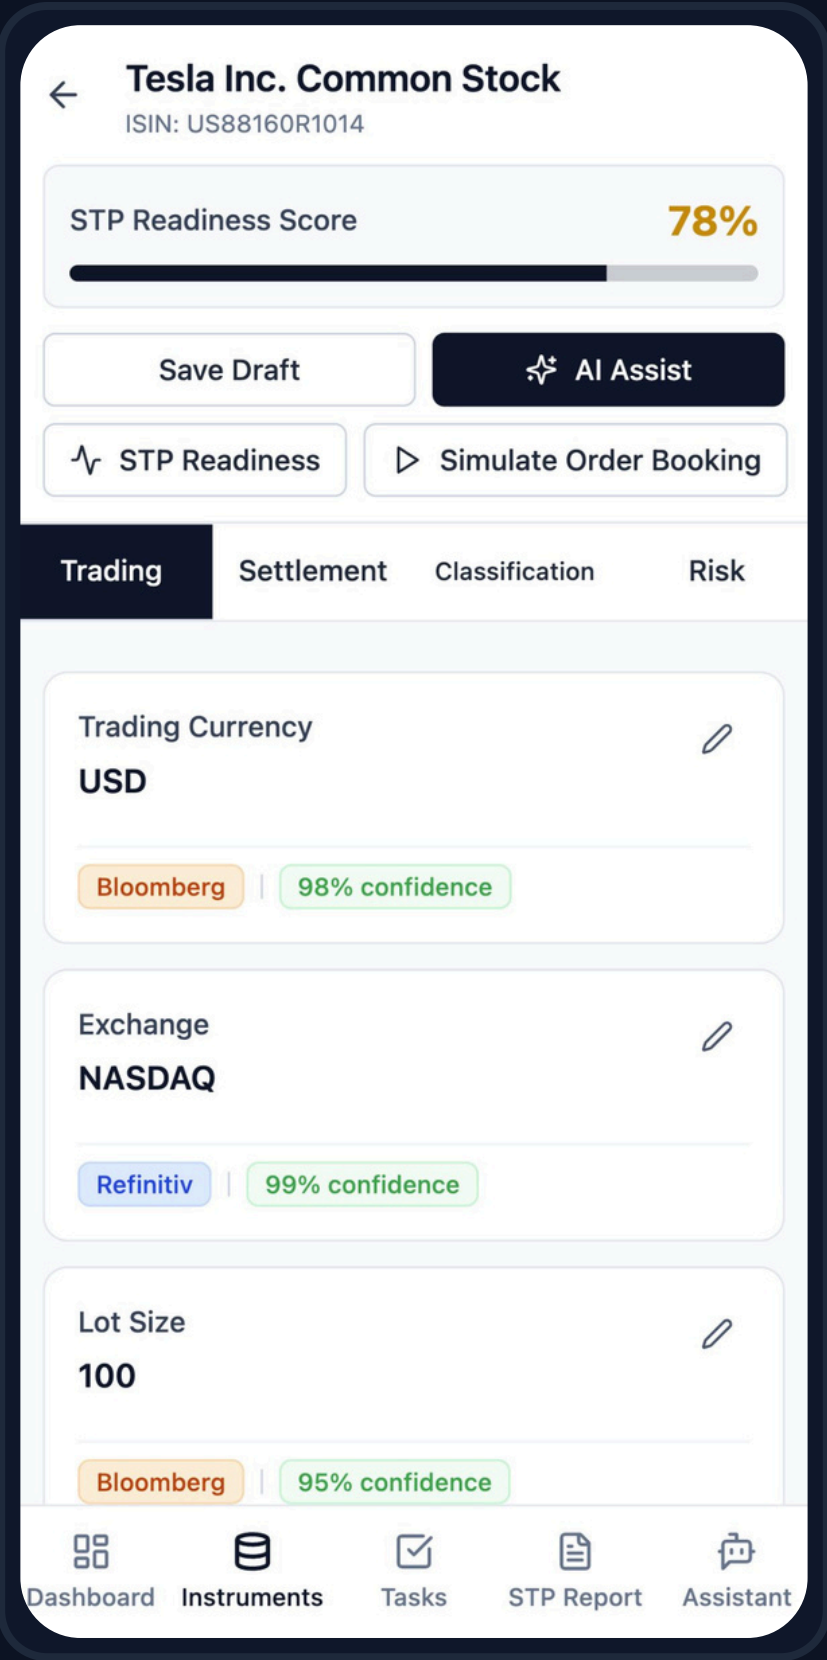

Search by ticker or ISIN — confidence score and data sources shown instantly

Multi-Source Fetch

Bloomberg, Refinitiv, and internal history ingested in parallel with live completeness tracking

Core Workspace — Attribute Review

DataOps Analyst

Live STP Readiness Score

Real-time score (78%) calculated across all attributes —
amber below 90%

Multi-Source Confidence

Each attribute shows data source (Bloomberg / Refinitiv) +
confidence %

Conflict Resolution

Source conflicts surfaced inline with AI-suggested resolution
(e.g. T+1 vs T+2)

AI Assist Drawer

One-tap AI suggestions with accept/reject controls — reduces
manual lookup

AI Capability Layer

DataOps Analyst

Intelligent support — not a decision-maker, but an operational copilot

AI Assistant

DataOps Analyst

Intelligent support for instrument mastering

AI Assistant 16:32

Hello! I'm your AI assistant for instrument mastering. I can help you with STP readiness analysis, data validation, risk assessment, and workflow optimization. How can I assist you today?

Why is STP readiness low?

What attribute

Ask about STP readiness, missing data, or workflow optimization...

STP Report

Assistant

STP Score Diagnostics

Identifies which attributes are dragging the score down — blocking issues vs. warnings with point impact

Missing Field Detection

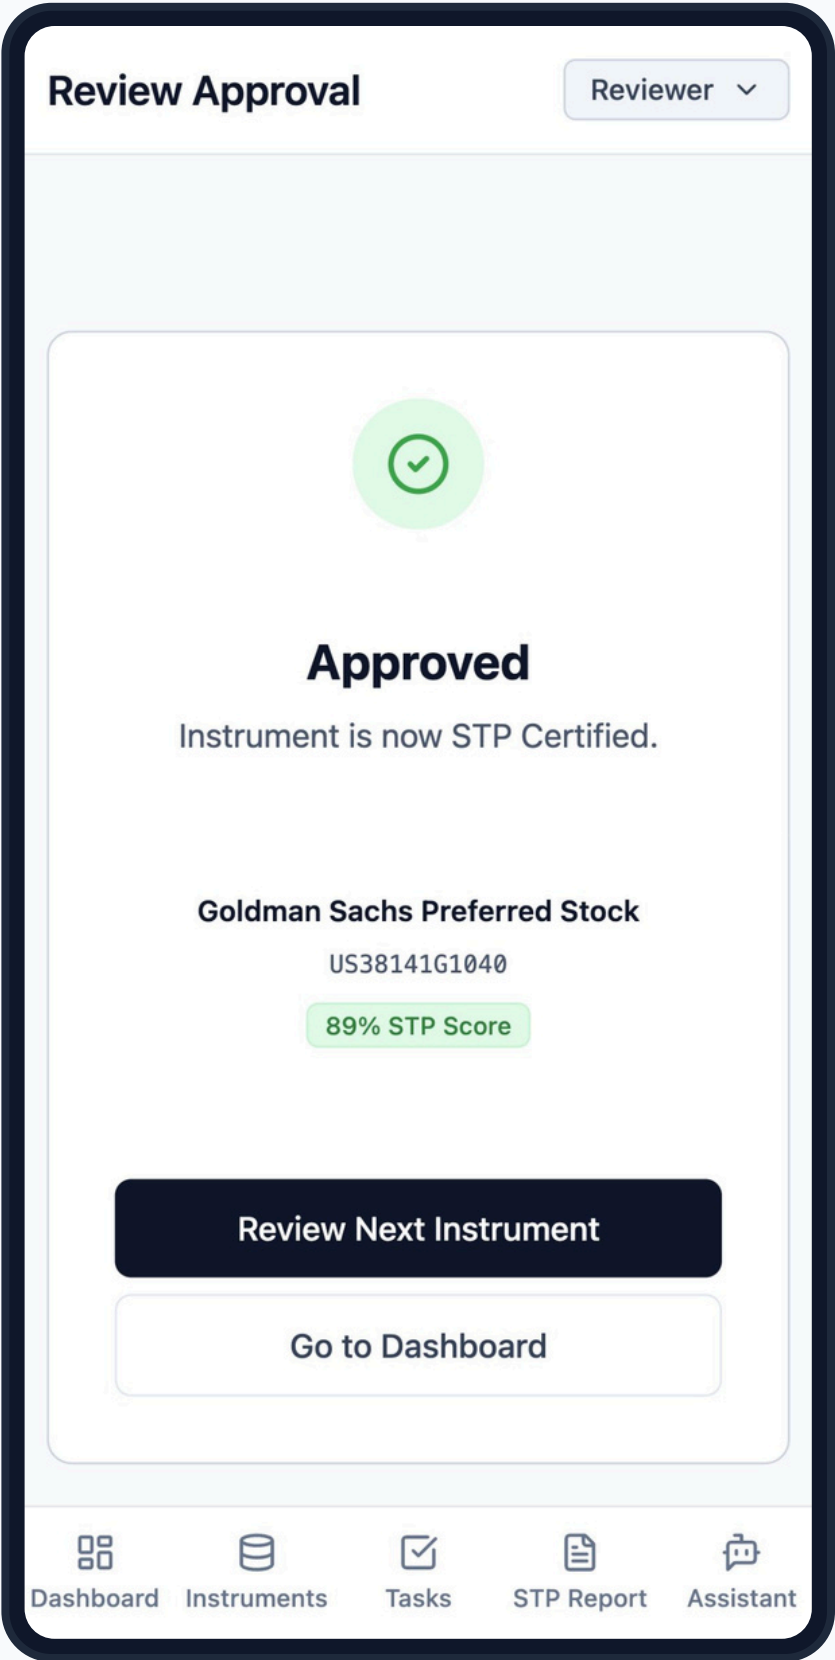

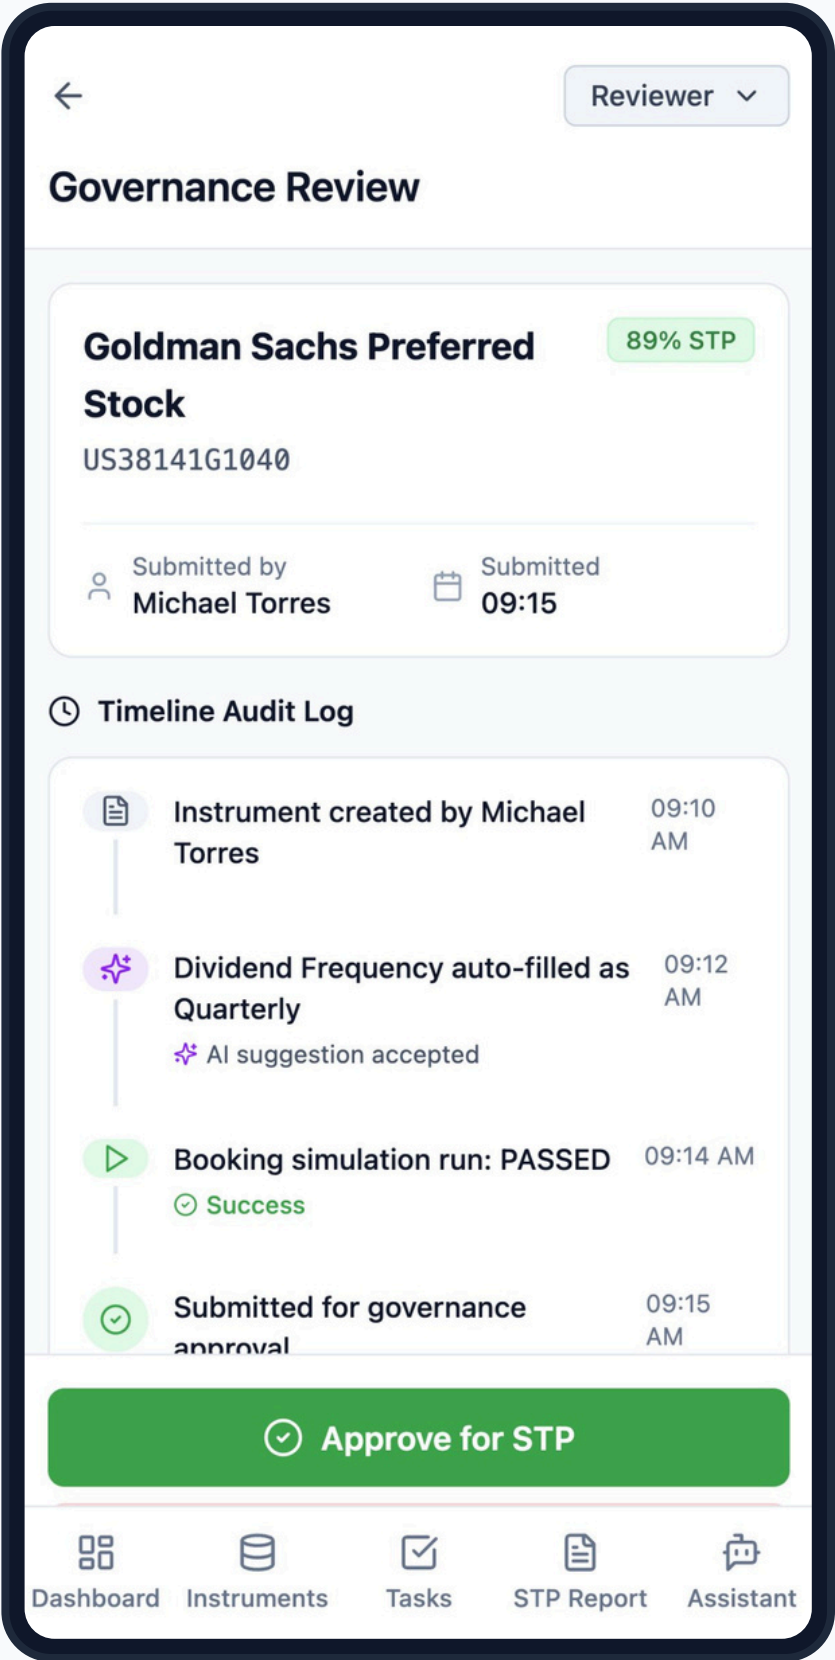

Surfaces incomplete attributes with auto-fill options drawn from 156+ similar instruments in the system

Similar Instrument Recommendations

Finds comparable instruments by asset class, issuer, and maturity — copies validated config to accelerate onboarding

Governance + Risk Review Flow

Risk Reviewer

Full Attribute Lineage

Every attribute traceable to its source — Bloomberg, Refinitiv, SEC, ANNA-DSB

Reviewer Override Controls

Risk Reviewer can downgrade confidence score with mandatory reason logging

Immutable Audit Timeline

Timestamped log of every action — creation, AI fill, simulation, submission, approval

Dual-Control Governance

Analyst submits → Reviewer approves — no self-certification, full segregation of duties

Product Thinking & Roadmap

NOW · Current Prototype

- Full Analyst workflow: search → enrich → validate → submit
- Reviewer approval with governance controls
- Timeline audit log & STP certification
- AI Assistant with 6 use cases
- STP Readiness Dashboard & Booking Simulation
- Dual-persona role switching (Analyst ↔ Reviewer)
- Mobile-first responsive design

NEXT · Roadmap Priorities

- Bulk upload workflow for high-volume instrument onboarding **P1**
- Automated risk scoring model integrated with Risk Management System **P1**
- RMS / Order Management System integration for live STP testing **P2**
- Predictive STP failure alerts before instrument is submitted **P2**
- Advanced analytics dashboard for DataOps team performance **P3**

Market Instrument Mastering Platform

Designed as a mobile-first enterprise workflow to transform fragmented master data operations into a governed, AI-assisted STP platform.

85% fewer STP failures

100% audit compliance

AI-assisted governance

90% Faster Onboarding
