SUMMARY

Senior Product Leader with 20+ years of experience building and scaling fintech, banking, and enterprise data products across 0→1 and 1→N stages. Proven track record of driving \$1M+ cost savings, double-digit revenue growth, and measurable improvements in activation, conversion, and engagement. Expert in translating ambiguous business problems into structured product strategies by balancing user needs, technical constraints, and commercial outcomes. Strong operator with deep technical roots, experienced in leading cross-functional teams and influencing stakeholders from C-suite to engineering to deliver high-impact, scalable products.

CORE SKILLS

- **Product Strategy & Execution**
Product Lifecycle Management · Product Strategy · Roadmapping · Go-to-Market Strategy · OKRs & North Star Metrics · Customer Segmentation · Monetization Strategy · Stakeholder Management
- **Growth & Optimization**
Activation & Retention · Conversion Optimization · A/B Testing · Funnel Analysis · User Research · Journey Mapping · Experimentation Frameworks
- **AI & Emerging Tech**
AI Product Development · Vibe Coding · Workflow Automation · AI-assisted Prototyping
- **Technical & Tools**
Agile / Scrum · Microservices · Cloud Platforms · SQL · CI/CD · JIRA · Confluence · APIs · Data Pipelines

EXPERIENCE

Founding Product Leader (AI Products) | Vaiteq Solutions | Mumbai, India | Jan 2024 – Present

- Identified inefficiencies in fragmented financial research workflows across analysts and product teams, leading to the creation of an AI-powered fintech intelligence platform aggregating 200+ data sources
- Defined product vision and roadmap by synthesizing user interviews, workflow analysis, and usage patterns, improving research efficiency by **80%**
- Built and validated 0→1 AI-native product experiences (conversational interfaces, knowledge systems, automated workflows) using rapid prototyping and iterative feedback loops
- Designed and launched a consumer-facing AI product independently, owning end-to-end lifecycle (problem discovery, UX, positioning, acquisition, activation, retention)
- Established early product-market fit signals through structured validation, user feedback loops, and engagement analysis

AVP – Product Lead (Senior PM Equivalent) | Bank of Singapore | Singapore | Jun 2019 – Dec 2023

- Owned product strategy and execution for the Instrument Creation platform, replacing a third-party system and delivering **S\$1.2M annual cost savings**
- Designed and launched compliance-critical workflows (HK Notification Flow), enabling real-time event-driven processing and regulatory adherence
- Led a cross-functional team of 10+ engineers, aligning business, compliance, and technology stakeholders to deliver scalable enterprise solutions
- Improved system performance by **70% reduction in load times** and eliminated critical system failures through architectural and data optimization
- Reduced development costs by **~25%** by refining product requirements, acceptance criteria, and delivery processes
- Awarded **Excellent Service Award (EXSA)** for product leadership and cross-functional impact

Sr Full Stack Developer (Product Focused) | Standard Chartered Bank | Singapore | Sep 2016 – Jun 2019

- Delivered bancassurance mobile product contributing to **17% revenue growth** through improved user experience and conversion flows
- Co-developed a personalised investment advisory tool enabling portfolio recommendations, driving **36% portfolio growth** and **28% revenue uplift**
- Partnered with Product, UX, and Business teams to refine user journeys, reducing rework by **20%** and improving engagement
- Owned end-to-end release delivery with **99% deployment success rate**, ensuring product stability and reliability

Sr Front End Developer | Singtel | Singapore | 2014 – 2016

- Led digital transformation of telecom e-commerce platform, **increasing conversion by 35%, revenue by 39%, and engagement by 60%**
- Identified friction points in the purchase funnel and improved user journeys through data-driven UX and front-end optimisations

Early Career: Software Engineering | Multiple Organisations | India, South Korea | 2001 – 2014

- Built and shipped mobile and web applications across enterprise and consumer use cases, serving 10,000+ users
- Developed early Android applications for enterprise clients, contributing to \$250K in additional business revenue
- Improved user engagement and accessibility through scalable front-end architectures and automation initiatives
- Established strong foundations in system design, user experience, and end-to-end product delivery

PROJECTS

AI Deal Room Assistant (M&A Workflow Copilot)

- Identified inefficiencies in deal preparation workflows for investment bankers and designed an AI-powered assistant to automate briefing, insights extraction, and IC memo generation
- Reduced preparation time from hours to minutes by redesigning workflows with structured intelligence layers and stage-based progression systems

Market Instrument Mastering Platform (Prototype for Enterprise Fintech)

- Designed a mobile-first product enabling operations teams to onboard and validate financial instruments for straight-through processing
- Solved data quality and workflow fragmentation challenges across trading systems

Product Teardown — Upstox (13M+ Users)

- Identified activation gap (40–60% inactive users) through funnel and cohort analysis
- Designed a prioritized roadmap using RICE framework, targeting +5pp activation improvement with minimal engineering effort
- Proposed GTM strategy balancing product improvements and growth investments

EDUCATION & CERTIFICATIONS

- PG Diploma, Digital Business Strategy & Transformation — *Emeritus Institute*
- Product Management Certification — *HelloPM*
- Growth Marketing Immersion — *GrowthX*
- Professional Scrum Product Owner (PSPO) and Professional Scrum Master (PSM) — *Scrum.org*
- Certified Usability Analyst — *HFI*
- Web Analytics Certification — *Avinash Kaushik Mentorship*
